

Surrogacy – U.S. Solutions to a Chinese Problem

Project Title	Surrogacy – U.S. Solutions to a Chinese Problem
Project Summary	Research U.S. Surrogacy Laws and the China Network
Country	United States
Country/Region of Focus	China

Project Description

Embassy Beijing has seen dramatic growth in surrogacy services provided to Chinese citizens by American providers. With murky surrogacy laws in China, it's more important than ever to understand the web of surrogacy laws in the United States along with the network that advertises these services in China. We are requesting an intern to develop a matrix of American surrogacy laws (both at the federal and, more importantly, state level). We also would like a chart on how Chinese citizens acquire these services (with a focus on California, New York, and Florida). Who are the providers? How are the services advertised in China? How are the services facilitated? We need a bright, capable, Mandarin-capable intern to help us better understand the surrogacy network.
